

Rhea, FreshFood24 and Miluxor develop MrLunch automated canteen

Rheavendors Servomat, FreshFood24 and Miluxor have partnered to collectively develop a new automated canteen solution for workplaces called MrLunch.

Rheavendors Servomat is the German branch of Italian vending firm Rhea Vendors Group, while FreshFood24 manages catering services for businesses and Miluxor is a German coffee producer.

Intended to be open 24-hours a day, MrLunch features fresh meals that have been prepared by FreshFood24, which are then stocked in Rhea vending machines that can also dispense Miluxor coffee, beverages and snacks to create a 'complete menu' for workplaces.

According to a joint statement from the companies, the MrLunch solution aims to provide a fully-automated canteen and catering service that meets the post-pandemic requirements of businesses, such as varied working patterns and a mixture of home and office work, that could make traditional office canteens less cost-effective.
